

Magnet Lock

Optional—Z & L Bracket

The electro-magnetic locks can be fitted to inward and outward swinging doors where head-height is not a problem and greater holding force is required.

This form of security can be used in most access control applications.

Mini / Standard Magnet Locks

- 600 lbs (272 kg) holding force—Mini Magnet
- 1200 lbs (544 kg) holding force—Standard Magnet
- Suitable for inward opening doors using optional Z&L bracket
- Virtually maintenance-free—no moving parts
