

## i-BOX now with ARC Support

The i-BOX which provides IP based integrated access control and environmental monitoring now also incorporates ARC (Alarm Receiving Centre) support. In partnership with Monitor Computer Systems, the company behind the Sentinel Plus ARC software, we have implemented i-BOX drivers.

The i-BOX now reports alarms directly to the vast majority of all approved ARCs within the UK. A large number of sensors are supported including temperature, humidity, flood, dust, mains present, voltage, current, kwh etc.

The i-BOX IP system is monitored in exactly the same way as standard IP-based alarm systems with similar controlled response and key holder follow-up.

Environmental damage is now the highest form of business interruption, as a result of breakdowns of boilers, air conditioning units and mains failure. Early response and action will minimise possible damage. With the increasing reliance on data and communication, failure to respond can have disastrous long-term effects.
